Factory and Process Plant Layout and Visualization with Pro/ENGINEER® Models

Moers, Germany and Pittsford, NY, USA - 19 May 2009: CAD Schroer Group (CSG), the global engineering solutions provider, will be showing Pro/ENGINEER® users at PTC/USER World how to win more projects more quickly. Users can now integrate their models into quick 3D layouts of entire factories or process plants for impressive tender designs, then reuse the data throughout each project engineering phase. CAD Schroer's Premier Sponsor Presentation will be held on Monday, June 8, 3:30-4:00 PM. The company is exhibiting its full range of integrated solutions for PTC® customers at booth 309.

MPDS4™ - CONFIGURE > SELL > DETAIL > DELIVER

During its presentation, CAD Schroer will demonstrate how customers like Atlas Copco use MPDS4 with FACTORY LAYOUT to quickly model their factories and customer installations by including and positioning Pro/ENGINEER models, routing piping, steelwork, ducting, cabling, HVAC and intelligent connectable equipment. See how they benefit from real-time fly-through inspection, consistency checking, collision detection, and rapid plant layout drawing generation.

STHENO/PRO™ - DRAFTING > IMAGES > LEGACY > EXTERNAL DATA

Also on show is STHENO/PRO, CAD Schroer's well-known drafting suite for Pro/ENGINEER users, combining the best of the 2D and 3D worlds. Easily augment your Pro/ENGINEER designs with additional design elements and information, non-parametric and not-to-scale. Benefit from additional functionality, such as color raster editing and scaled views, and a wealth of drafting power tools. Update your Pro/ENGINEER drawings with the click of a button, and manage them in your familiar PDM environment.

About CAD Schroer

CAD Schroer is a global software development company and engineering solutions provider, helping to raise the productivity and competitiveness of customers working in manufacturing and plant design, including the automotive sector and its supply chain, the energy sector and public utilities. CAD Schroer has offices throughout Germany, Belgium and the Netherlands, and independent subsidiaries in France, Italy, Switzerland, the United Kingdom and the United States. CAD Schroer's product portfolio includes 2D/3D CAD, plant design, factory layout and data management solutions. Customers in 39 countries rely on MEDUSA®, MPDS™ und STHENO/PRO® to provide an efficient, flexible and integrated design environment for all phases of product or plant design – cutting costs while raising quality. CAD Schroer emphasises close customer partnerships and supports its clients' objectives through extensive consultancy, training, development, software support and maintenance services.
